Subject: [EXTERNAL] RE: Program Plan Modification Report Update

Hi Chris,

Will RCRA-C be closed by March 2019?

Comments based on last year's report:

1. Throughout document: Please confirm footnotes have all been correctly revised from 2015 to 2017. Footnotes are currently inconsistent, 2015 and 2017.
2. Page ES-3, 1st Paragraph: EPA doesn't believe this is the appropriate document to describe partial deletion protocol. Please see suggested language change in attached document. This change is made throughout the report.
3. Page ES-3, Last Paragraph: Please see suggested language change in attached document. This change is made throughout the report.
4. Sec 3.1, 3rd Paragraph: Confirm land use of central area. If revised continue throughout the document.
5. Sec 3.2, Boundary OU: Please add text explaining ROD has been signed.
6. Sec 5.0: Please see suggested language change in attached document.

Thanks,
Daewon

Subject: Program Plan Modification Report Update

Hi Everyone – The Program Plan Modification Report (PPMR) is due to be updated next month. Last year, we agreed that we would discuss modifications prior to submitting this annual update. Here is what I believe needs to be updated:

Update the executive summary to document BOU (OU-6) Order and Area 40 OU RAP

Update Table 1-1 RCRA table and possibly the discussion of RCRA (anticipate elimination of RCRA facility boundary with expiration of permit in March 2019)

Update Table 2-1 to document that BOU Order and Area 40 RAP have been issued and document the RAP-required remedies for the Area 40 source areas

Update Table 5 - Schedule for Area 40 and due date for EOU RI report

We would also like to discuss the possibility of identifying additional, more manageable, Operable Units. Please let me know if you have any additional updates that you would like to propose for the 2018 PPMR update.

Thanks, Chris
